PREMIUM GLOSS FINISH *by* FORMICA GROUP

AR+ is a High Gloss HPL with a superior scuff and mar resistance and therefore usable on vertical and horizontal surfaces. Formica's own laboratory tests show remarkable results. It has also been tested externally by LGA Institute with official certification of AR+ superior performance.

Steel wool? Yes, one has to push really hard to get even the smallest scuff on AR+. It is also available in other designs and trendy colors.

AR+ not only performs better in scuff and mar resistance than any gloss HPL product in the market, but it also keeps the gloss level after heavy use. AR+ is a durable high gloss that will make the furniture look newer for longer.

Marine engines: a key technology in continuous innovation
Since the first steamship was invented, sea engines provide motion, reliability and safety to both people and goods. It is an extremely important technological system for the boating world, which over the years has been working to significantly extend the quality of its equipment, in terms of performance and life span.
